

Ground Protection

Temporary And Permanent Ground Protection

We have a choice of products for protecting outdoor ground surfaces from damage due to heavy vehicle or pedestrian traffic.

- Rugged polymer panels for temporary access roads over soft or muddy ground.
- Non-slip interlocking grid panels for car parking areas, driveways, access roads and many other applications.
- Safe, stable and clean parking on grass using slip resistant mesh.
- Temporary covering for grass using reinforcing mesh backed by a geotextile surface.

Nationwide Installation Service

We are able to install all our products anywhere in the UK. Please ask us for a quote.

Temporary Roads, Car Parking, Grass Protection, Driveways etc.

Ground Protection Mats

Our temporary road panels make the going easy when you need to move heavy vehicles and equipment or high volumes of pedestrian traffic over soft or muddy ground.

These rugged ground protection mats are capable of taking loads of up to 80 tonnes and withstanding extremes of heat and cold. They are made from high density polythene making them easy to move and install by two men without the need for heavy lifting equipment.

Outline Specification

- **Material:** Polythene
- **Colour:** Black
- **Length:** 2400mm
- **Width:** 1200mm
- **Weight:** up to 40kg per mat approx.

For heavy vehicles and equipment:

- Construction sites
- Temporary access roads
- Utility maintenance
- Civil engineering works

Ground protection mats are tough and versatile enough for a huge range of applications. They can protect turf from damage when heavy vehicles need to cross grassed areas and prevent equipment and vehicles from losing traction or sinking into soft ground and sand.

Strong steel joiners are used to connect adjacent mats together making a secure access road or a large firm area for work, parking or storage. Steel fixing pins can be used to secure the panels in place to avoid movement.

GrassProtecta®

The Best Solution

- Grass car parks
- Overflow grass car parks
- Pedestrian Paths
- Access routes
- Light aircraft taxiways
- Equestrian surfaces
- Grass verges
- Caravan park access and caravan bays
- Front lawn parking

GrassProtecta® grass reinforcement mesh is an improved heavy duty thick slip resistant polyethylene grid for reinforcing and protecting grassed surfaces prone to wear, rutting and smearing which can result in a muddy surface incapable of withstanding vehicular or pedestrian applications. Terram's new GrassProtecta® grass reinforcement mesh has been developed with an oscillated mesh structure which is designed to increase traction and improve slip resistance by up to 97% compared to standard straight oriented meshes. GrassProtecta® grass reinforcement mesh is supplied on 2m x 20m & 1m x 10m rolls in two thicknesses (11mm & 14mm) as determined by the application and manufactured from partly recycled UV Stabilised polyethylene polymer.

- Slip resistant polymer mesh
- Supports up to 8 tonnes per axle
- Ideal for permanent locations
- Cost effective, easy installation
- Lays on surface, minimal preparation required

GP
Grass Carpet
 2m x 20m

Ideal for pedestrian and vehicle access over grassed areas
 Perfect solution for coping with flooding at outdoor events
 Provides a clean path or road over muddy ground Suitable for wheelchair access routes
 Ideal for outdoor concerts and other events

EnduraGrid Panels

EnduraGrid is a non-slip interlocking paving system that reinforces the ground surface and is ideal for parking areas, driveways, access roads and pedestrian paths. After installing, the panels can be filled with soil, sand, gravel or other loose materials to give a practical or decorative finish.

The open structure of the panels prevents movement of any fill material, allows expansion and contraction in different temperature conditions and ensures free drainage, helping to reduce the risk of flooding in susceptible areas.

EnduraGrid panels are made in the UK from tough, 100% recycled polythene and can take the weight of a 44 tonne vehicle.

Typical Uses

- Pedestrian Access
- Reinforcement System for Airstrips
- Helicopter Landing Pad
- Utility Access
- Golf buggy paths
- Protection Against Erosion
- Reinforcement & Secure Embankments
- Driveways
- Off-Street Parking
- Landscaping
- Shed / Greenhouse Bases
- Rooftop garden
- Parking on grass / fields
- Access Roads
- Emergency Access Routes

Ground Protection UK

Ground Protection UK is based in Darlington, Co. Durham providing solutions nationwide for access, parking and ground reinforcement problems. We have a dedicated team of estimators, site foremen and installers who provide a quick, efficient and professional service.

We can offer a complete package of supply and installation working together or simply a supply only service if required. We are available to offer advice and personally visit your site to determine the best product to suit your individual requirements.

Don't hesitate give us a call now to see how we can help.
